Computer Troubleshooters
B.E.S.T. Plan Descriptions

Holiday Greetings!

Happy Holidays!

I want to send all my clients and friends best holiday wishes. I hope you have a peaceful and joyful break from the usual work grind.

If you need a writeoff before the end of the year, you can pre-pay your 2007 service contract and save some money, too. Please read below for more details.

Keep us in mind after the presents have been opened. I can help with setting up a new "toy" and moving data from the old system, setting up a network, hooking up a digital camera to your computer, etc.

May 2007 bring prosperity and joy to you and your family.

New Service Plans Now Available

We have developed a fantastic set of service offerings that will improve the stability of your system and save you time and money. Our B.E.S.T. program (Business Enhanced Support Technology) can be tailored to meet almost any configuration. The goal of these service plans is to move from "reactive maintenance"

to "proactive support". Instead of waiting until things have gone to a point of a total loss of productivity (and not to mention your patience!), we can offer a service plan that will head off problems and keep your system running smoothly.

To learn more, please visit my website and click on the

green B.E.S.T. logo.

Please note that you can still sign up before the end of the year and pre-pay your monthly service fee to get your 2006 write-off. You get a 10% discount if you pre-pay 6 months or more of service.

DON'T WAIT, CALL NOW!!!

More about our service plans...

Strand Technology

I am a member of the world's BEST computer service franchise. With over 450 franchisees worldwide, our integrated network means that our customers aren't dependent on just one person. The total franchise team of technical experts with

a wide range of skills and abilities backs up each operator so we can handle practically any situation.

Computer Troubleshooters is dedicated to helping business owners and home users get more productivity out of their computer systems.

I have years of experience working in the technology industry and offer my clients a wealth of knowledge and experience implementing technology. I specialize in networking and server infrastructure design and implementation. Keep me in mind when you are thinking about expanding your business or changing how you access information. I can help you with website implementations, too.
